

## **MABEL PLUS TRI POLAR RADIO FREQUENCY SKIN TIGHTENING**

“The deep heating technology of the MABEL PLUS RF treatment allows skin to repair itself naturally. That process, in turn, creates natural looking results that get better with time”

YOUR SALON INFO HERE .....

Look and feel great – instantly – with MABEL PLUS TRI POLAR RADIO FREQUENCY treatments. The optimal non-invasive way to tighten your skin and contour your body.

Enjoy immediate visible improvement and long-lasting results with no surgery and no downtime. With this simple and convenient “walk-in, walk out” procedure, you can maintain your daily routine... and come out looking younger and feeling better than ever!

MABEL PLUS RF treatments stimulate your body’s natural collagen renewal for incredible skin-tightening results and a substantial improvement in the appearance of wrinkles. MABEL PLUS RF treatments contour your skin and give it a fresh, healthy rejuvenated appearance and texture.

MABEL PLUS treatments can give you the look you’ve always dreamt of – painlessly. For any skin type and colour

As you age, your skin’s collagen and elastin – which are proteins that keep your skin tight – break down faster. As your skin loses elasticity, you may develop wrinkles and fine lines, including crow’s feet, shadows between your nose and the corners of your mouth and your skin may appear to look more tired and dull.

MABEL PLUS RF technology focuses deep heat to the collagen layer causing existing collagen to contract for an immediate improvement and skin tightening effect. Over the long-term, this heating accelerates metabolism to augment generation of new collagen fibers – for a tighter, smoother, more contoured shape, appearance and texture

#### **When can I expect to see results?**

The majority of patients are able to see visible results difference immediately after the 1st treatment – especially following treatment on the face. However, in order to achieve long-term results, you will need to undergo several treatment sessions.

#### **How many sessions do I need in order to achieve long-term desired results?**

Long-term results vary depending on the area to be treated and the desired result. In general, you will need to undergo between 4 and 8 treatments on average. The number of treatments sessions is determined according to your specific needs by the physician or aesthetic professional. In order to sustain the results, it is important to maintain a lifestyle that includes a healthy diet and exercise.

#### **What does a treatment feel like?**

Treatment feels like a warm massage. It is pleasant and pain-free. Some patients even report falling asleep during treatments. The treatment lasts an average of between 20 and 40 minutes, depending on the treatment area.

#### **What do I need to do in order to maintain the result?**

In order to maintain the results it is important to maintain a lifestyle of healthy diet and exercise. In addition, it is recommended to undergo maintenance treatments every 4 to 8 weeks to prolong and enhance the results.

#### **Do treatments work on all skin colors?**

Treatments are suitable for all skin colors, including dark and pigmented skin. The treatment is based on Radio Frequency (RF) energy: energy that produces heat in the target area. Unlike lasers or other optical energy-based devices, RF is “color blind” meaning that it has no affinity to skin pigmentation, such as melanin or hemoglobin.

#### **How do I know if treatments are right for me?**

In general, if you are healthy, then you are a suitable candidate for treatments. There are a very few specific treatment contraindications such as: pregnancy, superficial metal implants in the treatment areas, and a pacemaker. Your physician or aesthetic professional will confirm your suitability after taking a brief medical history.

#### **Can I continue my normal routine immediately after treatment sessions?**

After treatments, you can immediately return to your daily routine. It is a “walk-in, walk-out” procedure with no downtime.

#### **Is the treatment suitable for women after pregnancy?**

Treatments are suitable for women who are post-pregnancy for circumference reduction and tightening of loose skin. However, it is recommended to start the treatment only between 1 and 3 months after delivery, in accordance with each individual’s recovery.
